

Kai Pereira

kaipereira@hackclub.com • kaipereira.com • github.com/kaipereira

Education

University of Victoria

Electrical Engineering

Currently taking a gap year at Hack Club

Victoria, BC, Canada

2030

Experience

Engineering & Events

Hack Club

Burlington, VT

Present

- Running one of the largest high school engineering grant programs with 4000+ users, 2500+ projects and \$50 000 given out to fund teenagers making cool projects - forge.hackclub.com
- Working on getting more students into ASIC design by sponsoring the largest multi-project wafer (MPW) for students only, and also providing FPGA boards, debugging tools and more - in-progress
- Created a devboard tutorial with 100+ student designs manufactured. Frontpage Hacker News, 70+ stars GitHub kaipereira.com/journal/build-a-devboard

Projects

Cheetah MX4 Mini & Fold-Up 3D printer

- Designed, manufactured and tested my own custom STM32H7 3D printer motherboard. 170+ stars on GitHub, frontpage Hacker News: github.com/KaiPereira/Cheetah-MX4-Mini
- Actively building a fold-up, scissor-lift, cross-cantilever 3D printer to use my compact 3D printer motherboard: github.com/KaiPereira/Foldup-3D-Printer

Present

Overglade PCB Badges

- Designed and manufactured 100+ PCB e-ink event badges for the Overglade hackathon in Singapore. 120+ stars GitHub, frontpage Hacker News, one of the most viewed PCB event badges on the planet. github.com/KaiPereira/Overglade-Badges

January, 2026

Various PCBs and Hardware Projects

- Created over 10+ PCBs, ranging from FPGA boards to meshtastic nodes and more, as well as many larger hardware projects like 3D printers, keyboards, etc. github.com/KaiPereira

Present

Additional

Language Skills: English and French

Technical Skills: Web design, to full-stack, to embedded systems, larger hardware projects and more

Volunteer Experience: Previously volunteered at Hack Club (now working there) to help thousands of students

Interests/Hobbies: Active maker designing PCBs and various hardware projects in my free time
